Section 6: Annual evolution of remuneration, company performance and average remuneration based on the full-time equivalent of the issuer's employees who are not managers during the last 5 financial years

III. Conclusions

I. Introduction

1. Presentation of the Company Romcarbon S.A.

Romcarbon SA ("Romcarbon"), founded on October 27, 1952, under the name "FABRICA CHIMICA NR. 12, is one of the leading plastic packaging manufacturers in Romania, being also among the first companies listed on the Bucharest Stock Exchange (BVB).

With a history of over 70 years, of which 28 as a company listed on the BVB, under the symbol ROCE, Romcarbon is a benchmark of resilience and adaptation to the constantly changing global requirements and trends in the plastics processing industry. Romcarbon is a company with a significant impact on the industry in which it operates, in a responsible and involved manner, by taking sustainable measures and decisions.

Over 70 years after its establishment, Romcarbon is a recognized brand on both the Romanian and European markets. This longevity and privileged position is primarily due to the fact that, over time, the company has been consistent with the principles of business ethics and internal policies aimed at ensuring a solid and efficient management of both risks and opportunities.

Romcarbon has developed, innovated, and continuously diversified its product range, persistently pursuing the objectives it has set. From this perspective, we continue to aim for Romcarbon's activity to become increasingly sustainable and aligned with global trends, which is why, in the medium and long term, we aim to develop our own recycling and production of polymers from recycled materials, as well as the implementation of photovoltaic power plant projects for the production of electricity from the conversion of solar energy.

Romcarbon is, de facto, one of the pioneers of the circular economy in Romania, thus, since the 1980s, the company has applied the circular use of some of the materials in its own production activity, having integrated a polyethylene recovery sector, in which it treats post-consumer waste, from polyethylene foils and films, mainly from agriculture, and a workshop for recycling used oil filters, collected from major consumers of such equipment in the transport industry.

Therefore, although it represents a relatively new trend in global economic practices, for Romcarbon circular economy practices are not new.

Putting into practice its experience in the field of circular economy, Romcarbon opened in 2012 a new direction of development, in the field of plastic recycling, the production of virgin and recycled raw materials and compounds and will thus continue on the path of circular economy that it started a long time ago.

Moreover, Romcarbon has always been associated with the idea of circular economy and recycling, being, since 2005, one of the founders of Green-Group, a group of companies that in recent years has become the largest integrated recycler in Southeastern Europe. In 2022, Romcarbon decided to sell its stake in Green-Group, determined to focus its financial and management efforts exclusively on the development of its own recycling activity. In this sense, the direction of sustainable development is continued with the objective that by 2030, 35% of its turnover will be achieved from the sale of regenerated polymers.

Romcarbon is a company with entirely private capital, with a share capital of 52,824,419.20 lei, divided into 528,244,192 registered, dematerialized shares, worth 0.1 lei each, as a result of the capital increase carried out on 30.06.2023.

The main activities carried out by Romcarbon consist of the production of various plastic products, the company's production activities being organized in seven profit centers (PC), each with a different activity profile.

S.C. Romcarbon S.A. activity profile is the production of polymer products, the production of filters and filter elements, the production of personal protective equipment and activated carbon necessary in the food, chemical and pharmaceutical industries, the recovery of plastic waste, regranulation and the

manufacture of compounds.

In 2025, production activity took place in the 7 Profit Centers as follows:

- Profit Center no. 1 with the Filters Section where air, oil, fuel filters for cars, trucks and tractors, railway equipment and industrial installations are produced;
- Profit Center no.2 with two workshops:
 - The Individual Respiratory Protection Equipment Workshop that produces individual respiratory protection equipment - masks and cartridges - for the chemical industry, the mining industry, for the M.Ap.N, civil defense and collective protection equipment.
 - The Activated Coal Workshop that produces charcoal - a semi-finished product necessary for protective equipment, as well as charcoal used in the petroleum, food, chemical and pharmaceutical industries.

Profit Center no. 3 with the Polyethylene workshop where polyethylene packaging of various sizes is made (bags, sacks, covers, by extrusion, printing, welding), general purpose foil, solarium foil, thermo-shrinkable foil, photopolymer clichés.

- Profit Center no. 4 with two sectors:
 - PVC Pipes Sector whose activity is the production of pipes - semi-finished products for domestic consumption;
 - PVC Supports Sector in which pressed PVC supports are produced for use in the field of road signs.
- Profit Center no. 5 with the Extruded Polystyrene Workshop consisting of the extrusion and thermoforming sectors, where packaging for the food industry is made - casseroles and construction products in the form of ribbed, perforated XPS boards and rolls.
- Profit Center no. 6 has 2 Polypropylene workshops where polypropylene products are made: laminated or non-laminated woven bags, in various types and sizes for packaging products from agriculture, the food industry and the chemical industry.
- Profit center no. 7 – has as its object of activity:
 - Treatment of plastic waste from WEEE recycling and the automotive industry, by separating recyclable polymer fractions, grinding, extrusion, filtering the separated fractions. The finished products of this center are plastic materials in the form of grinding or granules, compounds and composite materials.
 - Treatment of post-industrial and post-consumer waste of polypropylene fabric as well as post-consumer waste of polyethylene foil by density sorting, extrusion and filtering. The finished products of this center are regranulates / compounds of polyethylene and polypropylene.

Romcarbon S.A. also holds a series of financial investments, in the form of significant participations in Romanian and foreign legal entities, affiliated with the Company. At the date of this report, the situation of financial investments is as detailed in the table below:

Table 1: Romcarbon Group Components

Company	Total share number	No. Of shares held	Percentage of holding (%)
RECYPLAT LTD CIPRU*	16.000	16.000	100,00%

2. Statement of the Chairman of the Board of Directors of Romcarbon S.A. regarding the application of the remuneration policy

Huang Liang Neng, Chairman of the Board and CEO

We reaffirm our commitment to protecting the health and well-being of our employees, as well as the local community. In this regard, we have implemented digitalization projects for support functions and developed flexible work programs, complemented by investments in equipment and IT solutions aimed at ensuring operational continuity and efficiency.

These initiatives were complemented by consistent efforts to maintain jobs, in a context marked by high volatility in the labor market. Despite the financial challenges generated, we managed to protect our activities and ensure stability for all stakeholders: employees, customers, business partners and local and central authorities.

The remuneration policy represents a fundamental strategic element in supporting these efforts. An adequate and coherent reward system is essential for the optimal functioning of our organizational strategy and for achieving the objectives we have set ourselves.

3. Applicable remuneration policy

This Report on the remuneration and other benefits granted to the Administrators and the General Manager of the company during the financial year 2025 (hereinafter collectively referred to as "Managers") is based on the Remuneration Policy within Romcarbon S.A., approved by Decision no. 1 of 28.04.2021 of the Ordinary General Meeting of Shareholders and is prepared in compliance with the provisions of Law no. 24/2017 on issuers of financial instruments, with subsequent amendments and completions, of Regulation no. 5/2018 of the Financial Supervisory Authority, on issuers of financial instruments and market operations, of Law no. 31/1990, on commercial companies, of the Articles of Association of ROMCARBON S.A., of Decision no. 1 of 25.01.2024 of the Ordinary General Meeting of Shareholders, on the appointment of members of the Board of Directors of ROMCARBON for a term of office of 4 years and of Decisions no. 19 of 24.12.2019, no. 1 of 20.01.2020 and no. 4 of 09.02.2024 of the Board of Directors of Romcarbon regarding the appointment of the General Manager, regarding the approval of the Romcarbon Organization Chart and respectively regarding the extension of the mandate of the General Manager of the company from 17.02.2024 to 17.02.2028.

Romcarbon's remuneration policy was built to meet certain objectives, aligned with the company's major objectives, namely those of contributing to the company's long-term sustainability, maintaining the company's competitiveness on the labor market, ensuring adequate conditions for attracting managers/employees with skills necessary and useful for achieving the company's purpose, creating a satisfactory level of retention of managers/employees, supporting/facilitating the successful implementation/development of the company's strategy in the short, medium and long term and providing tools to reward exceptional performance/achievements.

The annual report on the Remuneration Policy and other benefits granted to the Administrators and the General Manager of the company during the financial year 2025 will be submitted for approval to the shareholders of the company who will meet at the Ordinary General Meeting of Shareholders convened for 20.05.2026 (21.05.2026 – second convocation) and presents:

II. Remuneration for the financial year 2025

Section 1: The remuneration structure of the company's managers

Section 2: Variable remuneration in the form of shares and the right to recover the variable remuneration (component) in the form of adjustment (malus) and claw-back

Section 3: Company performance in the 2024 financial year

Section 4: The degree of compliance of the remuneration with the approved remuneration policy and the performance criteria applied

Section 5: Derogations from the application of the remuneration policy and/or the procedure for its application

Section 6: Annual evolution of remuneration, company performance and average remuneration based on full-time equivalent of the issuer's non-executive employees over the last 5 financial years

Section 1: The remuneration structure of the company's managers

A. Board of Directors

Romcarbon S.A. is managed by a Board of Directors composed of 3 members, elected by the Ordinary General Meeting of Shareholders, in accordance with the legal provisions, by secret ballot, for a period of 4 years, with the possibility of re-election.

The election of directors is made from among the candidates for the positions of director, nominated by the incumbent members of the Board of Directors or by the shareholders.

The Board of Directors is responsible for taking all necessary measures for the conduct of the company's activity and for the supervision of its activity, the Board's attributions being those detailed in the Company's Articles of Association as well as those established by Decisions of the General Meeting of Shareholders.

By Decision of the Ordinary General Meeting no. 1 of 25.11.2021, the mandate of member of the Board of Directors of Mr. Wang Yi -Hao, by the same decision being appointed as a member of the Board of Directors Mr. Wey, Jiann - Shyang, for a term equal to the remaining term of his predecessor, respectively for a term valid during the period **29.11.2021-04.02.2024**.

Thus, from **29.11.2021 until 04.02.2024**, the composition of the Board of Directors of Romcarbon SA is as follows:

- ▶ Chairman - HUANG, LIANG - NENG
- ▶ Deputy Chairman - WEY, JIANN - SHYANG
- ▶ Member - TODERITA STEFAN ALEXANDRU

By the Decision of the Ordinary General Meeting no. 1 of 25.01.2024, the appointment of Messrs. Huang, Liang Neng, Wey Jiann - Shyang and Toderiță Ștefan - Alexandru as Directors of ROMCARBON S.A. was approved, for a new term of 4 years, starting with 04.02.2024, with the consequent maintenance of the unitary management system of the company. According to the decisions of the General Meeting of Shareholders, the 3 appointed members of the Board of Directors will exercise the mandate of director during the period 04.02.2024 - 04.02.2028, free of charge, under the effect of those previously approved by the Decision of the Ordinary General Meeting of Shareholders no. 1 of 23.01.2020.

Thus, during the 2025 financial year, the composition of the Board of Directors of Romcarbon S.A. was the following:

Table 2: Composition of the Board of Directors of Romcarbon SA in the financial year 2025

Nr. crt.	Name and surname	Quality in Board	Term start date
1	Huang Liang Neng	executive member and President of the Board of Directors	04.02.2024 04.02.2028
2	Wey Jiann Shyang	independent, non-executive member and Deputy Chairman of the Board of Directors	04.02.2024 04.02.2028
3	Toderita Stefan – Alexandru	non-executive member of the Board of Directors	04.02.2024 04.02.2028

Remuneration and other benefits granted to the Administrators in the financial year 2025

With regard to the remuneration of the members of the Board of Directors, they exercise their mandate without being remunerated and without receiving other benefits, according to those decided by the Ordinary General Meeting of Shareholders of 23.01.2021, taking into account the principle of aligning the interests of the persons with decision-making power in the company with the interests of the shareholders and other parties involved.

With regard to any remuneration received by the Administrators of the company from any entity belonging to the same group, respectively from entities affiliated with Romcarbon S.A., during the year 2025, we specify that among the Administrators of Romcarbon S.A., the only one who received remuneration from an entity affiliated with Romcarbon S.A. during the financial year 2025 is Mr. Huang Liang Neng, Chairman of the Board of Directors and General Manager of Romcarbon S.A., who also holds the position of Financial Advisor within the company Livingjumbo Industry SA (a company in which Romcarbon S.A. holds 99.8571% of the share capital).

The remuneration received by Mr. Huang Liang Neng, who also holds the position of General Manager of Romcarbon SA, from entities affiliated with Romcarbon S.A., according to the aforementioned, will be detailed below in point B. dedicated to the remuneration of the General Manager.

A. Executive Management - General Manager (CEO)

According to the Articles of Association of Romcarbon S.A. and the provisions of Law no. 31/1990 on commercial companies, art. 143 paragraph 4, in the case of Romcarbon S.A., being a company subject to the legal obligation to audit the financial statements, the management of the company is delegated by the Board of Directors to the General Manager, who is responsible for carrying out all measures corresponding to the management of the Company, within the limits of the Company's object of activity and in compliance with the exclusive powers reserved by the Law or the Articles of Association, the Board of Directors or the General Meeting of Shareholders.

In this regard, in relations with third parties, the Company is represented by the General Manager, pursuant to the provisions of art. 143 paragraph 4 in conjunction with art. 143² paragraph 4 of Law 31/1990 on commercial companies.

The General Manager is appointed and may be dismissed from office by the Board of Directors, which establishes the duties, responsibilities and powers of the General Manager as well as his remuneration.

The position of General Manager of Romcarbon S.A. is held by Mr. Huang Liang Neng, who was appointed to the position of General Manager by the Board of Directors of Romcarbon S.A. based on Decision no. 19 of 24.12.2019, for a 4-year term starting on 17.02.2020 and until 17.02.2024. The mandate of the General Manager was extended by Decision of the Board of Directors of Romcarbon no. 4 of 09.02.2024, for a period of 4 years, respectively from 17.02.2024 to 17.02.2028, with the maintenance of all conditions and the already approved compensation, according to Decision of the Board of Directors of Romcarbon SA no. 1/2020.

The General Manager of Romcarbon S.A. fulfilled his duties during the 2025 financial year according to the Mandate Contract concluded with the Company, represented by the Board of Directors, and according to those established by Decisions of the Board of Directors and by Resolutions of the General Meetings of Shareholders.

Table 3: Executive management during the 2025 financial year

Nr. crt.	Name and surname	Position	Mandate termination date
1	Huang Liang Neng	General Manager	17.02.2024 17.02.2028

Remuneration and other benefits granted to the General Manager in the financial year 2025

The amount of the remuneration of the General Manager was also established by the Decision of the Board of Directors, being included, together with the other benefits, in the Mandate Contract concluded with the Company.

The remuneration of the General Manager in 2025 is composed of:

- Fixed monthly remuneration in the gross amount of 15,000 lei/month (180,000 lei/year);
- Variable remuneration - not granted;
- Other benefits in the total amount of 132,740 lei.

Details regarding the remuneration of the General Manager during the 2025 financial year can be found in the table below:

Table 4: CEO remuneration information in the 2025 financial year

Period of activity	Fixed remuneration			Variable remuneration		Special benefits	Pensions	Total annual remuneration Gross annual fixed remuneration	Relative proportion of variable remuneration (Variable remuneration / fixed remuneration Compensation for advisory committees)	Share of fixed remuneration in total remuneration (Fixed remuneration / Total remuneration) Other benefits
	Gross annual fixed remuneration	Compensation for advisory committees	Other benefits	Gross variable remuneration	Long-term variable remuneration (gross multiannual)					
01.01.2025 - 31.12.2025	180000	no	132740	no	no	no	no	312740	NA	58%

* NA – not applicable

The remuneration and other advantages/benefits granted to the General Manager in 2025 comply with the applicable statutory approvals as well as the approved Remuneration Policy.

The table below presents the elements included in the category "Other benefits" granted to the General Manager, such as travel expenses, medical insurance, company car, professional training, company housing, telephone, laptop, tablet, other benefits.

Table 5: Items included in the "other benefits" category in the 2025 financial year

Name and surname, Position	Period of activity	Non-financial benefits						
<p>Huang Liang Neng General Manager</p>	<p>2025</p>	Car	Travelling expenses	Accommodation	Professional Training / Training	Health insurance	Laptop	Telephone
		Da	Da	Da	Nu	Nu	Da	Da

In the 2025 financial year, the General Manager had to fulfill the objectives and attributions mentioned in the Mandate Contract concluded with the company and in the company's medium and long-term strategies, as well as manage multiple situations that arose during this financial year, which, correctly managed, positively impacted the results.

Thus, part of the General Manager's management strategy also consisted of taking all measures to ensure the company's activities are carried out safely for all stakeholders, in the context of difficult markets involved, of which the market for raw materials from recycled materials stands out, where there has been a decrease in customer interest in this type of raw materials due to the decrease in the price of virgin raw materials, the utilities market with high prices at a level difficult to imagine a few years ago, in the context of the geopolitical climate created by the war in Ukraine, and last but not least the labor market, which is showing a continuously increasing volatility.

A very important objective was the signing by Romcarbon of the financing contract for the project "Establishment of a recycling and recovery unit for plastic waste", aimed at rehabilitating and modernizing an existing technological space, adapted to function as a recycling and recovery unit for plastic waste, as well as the acquisition of machinery, installations and equipment for a new recycling and recovery unit for plastic waste. The project has a total budgeted value of 72,029,224.72 lei, of which 35,186,043.20 lei represents non-reimbursable financing. Within the same project, financing contracts were also signed with Banca Transilvania, to ensure Romcarbon's participation in the financing of this project.

In addition to the component of re-engineering to the latest standards in the plastics recycling industry and the polypropylene packaging industry, this project also includes an important component of energy production from renewable solar sources, intended for consumption within the project, which continues the investments made in the previous year, through which a photovoltaic system with an installed capacity of 998 kWp, fully financed from PNRR funds, was installed, as well as a photovoltaic system with an installed capacity of 399 kWp financed from own sources.

In fact, one of the pillars of the company's development strategy conceived by the General Manager for the coming period is precisely the reduction of the company's dependence on electricity supplied from the national system, and the replacement, to the greatest extent possible, of this type of energy with energy from renewable sources, photovoltaics.

In 2025, there were no increases in the fixed remuneration of the General Manager of Romcarbon, nor were other non-financial advantages granted except for those presented in the table above.

Regarding any remuneration received by the General Manager of the company from any entity belonging to the same group, respectively from entities affiliated with Romcarbon S.A. during 2025, we specify that the General Manager of Romcarbon holds, as stated above, the position of Financial Advisor within the company Livingjumbo Industry SA (a company in which Romcarbon S.A. holds 99.8571% of the share capital).

The status of remuneration received by the General Manager during 2025 from the companies affiliated with Romcarbon S.A., in which it has significant holdings, over 25% of the share capital, is presented in the following table:

Table 6: Situation of remuneration received by executive management from other entities in the Romcarbon Group in 2025

Period of activity	Affiliated company	Fix Remuneration			Variable Remuneration		Special Benefits	Pensions	Total annual remuneration	Relative proportion of variable remuneration (Variable remuneration / fixed remuneration)	Share of fixed remuneration in total remuneration (Fixed remuneration / Total remuneration)
		The gross annual fixed remuneration	Advisory committee compensation	Other benefits	Gross variable remuneration	Long-term variable remuneration (gross multi-year)					
01.01.2025 -31.12.2025	LivingJumbo Industry SA	101519	no	4460	no	no	no	no	105979	NA	96%

* NA – not applicable

Section 2: Variable remuneration in the form of shares and the right to recover the variable remuneration (component) in the form of adjustment (malus) and claw-back

The Company did not grant variable remuneration in the form of shares during the 2025 financial year.

To the extent that, in the future, the decision to grant a variable remuneration component in the form of shares will be taken, the Board of Directors will proceed, at the optimal time, to re-evaluate the remuneration policy, its revision and/or adequacy, so as to clearly establish, within the policy, the procedure

regarding the recovery of variable remuneration, including that granted in the form of shares, the period affected by the event determining the recovery and/or the type of restitution, etc.

Section 3: Company Performance in the 2025 Financial Year

In 2025 Romcarbon S.A. achieved the following financial indicators:

- Cumulative sales reached 194,436,269 lei, 13.83% less than in 2024. Net sales from the core activity, respectively from the sale of products obtained, decreased by 13,962,082 lei (8.78%) compared to 2024;
- Operational EBIDTA in 2025 was worth 5,624,072 lei, registering a significant increase of 5,044,478 lei (+870.35%) compared to 2024;
- The result from operational activities in 2025 was a profit of 3,273,903 lei, i.e. an increase of 10,475,161 lei compared to the previous year;
- The net profit recorded in 2025 is 1,903,619 lei, compared to the previous year when a net loss of 5,992,980 lei was recorded;

In terms of operational activity, the biggest challenges in 2025 were represented by the decrease in market demand, due to multiple causes that acted simultaneously.

Thus, both the recycled materials market and the packaging market are going through a period of declining demand, determined by a combination of economic, operational and behavioral factors.

First of all, we are dealing with the slowdown in the pace of production in certain industrial sectors, which has reduced the need for secondary raw materials, directly affecting the volumes of materials collected and processed by Romcarbon. At the same time, fluctuations in the prices of virgin raw materials have made recycled materials, in certain contexts, less competitive from a financial point of view.

Another element contributing to the decrease in demand is the change in consumer behavior. The decrease in the consumption of goods with a short life cycle and the optimization of supply chains have led to a decrease in the need for packaging, both from recyclable material and from plastic or other traditional resources.

Added to these are the logistical and operational challenges in the recycling sector. The increase in collection, sorting and transport costs, along with the difficulties encountered in obtaining a constant quality of recycled materials, have reduced their attractiveness for producers. In some regions, legislative changes or the slow pace of adopting unitary regulations have created additional uncertainties in the market.

Last but not least, the evolution of production technologies and the orientation of some companies towards alternative packaging solutions — including reducing the volume of materials used or switching to reusable products — have contributed to the decrease in demand for recycled materials and traditional packaging.

In this context, the industries in which Romcarbon operates are faced with the need for rapid adaptation: process optimization, technology investments, diversification of the material portfolio, but also strengthening collaboration between authorities, producers and recycling operators. Integrated and predictable approaches are essential for maintaining market stability and ensuring a sustainable framework for long-term development.

In 2025, the business environment in Romania and the European Union, as the main markets in which we operate, continued to feel the pressure of persistent inflation, which led consumers to significantly adjust their purchasing behaviors and spending priorities. In parallel, the constant increase in energy prices, amid the European energy transition and the volatility of regional markets, as well as the increase in the guaranteed minimum wage in payment, generated additional operational costs for companies, amplifying the challenges of financial sustainability and competitiveness.

The current international economic context in which there are global geopolitical tensions arising from the military interventions of the Russian Federation in Ukraine, respectively of Israel and the USA in Iran, have generated and are generating economic uncertainties on the raw materials market but also on the energy and capital markets, with global prices expected to be very volatile in the foreseeable future.

During this period, the management team, on the one hand, acted to adjust the selling prices of the products, so that they reflect the increases we faced in terms of utilities, minimum wage and logistics costs, continuing to pursue the increase in quantities sold, and on the other hand, great efforts were made to procure raw materials at the most advantageous prices, in order to ensure uninterrupted production activity.

Section 4: Degree of compliance of remuneration with the approved remuneration policy and the remuneration principles/performance criteria applied

During the 2025 financial year, remuneration was made in accordance with the principles applied in the administration/management of the company's activities, namely prudence, diligence, solid/sustainable development and effective risk management, without encouraging the assumption of risks incompatible with the activity profile, with the internal rules or with the company's articles of association.

Also, remuneration in 2025 respected the remuneration principles established by the applicable legal regulations on remuneration for work, the remuneration policy adopted by the company and was appropriate to the size of the company, its internal organization, as well as the nature and complexity of the company's activities.

Section 5: Derogations from the application of the remuneration policy and/or the procedure for its application

The remuneration during the financial year 2025 did not record any deviations from the application of the remuneration policy adopted by the company, as approved by the Decision of the Ordinary General Meeting of Shareholders no. 1 of 28.04.2021, regarding the Administrators, respectively the Decision of the Board of Directors of Romcarbon SA no. 1/2020, regarding the General Manager. Also, there were no deviations from the procedure for applying the remuneration policy.

Section 6: Annual evolution of remuneration, company performance and average remuneration based on full-time equivalent of the issuer's non-executive employees during the last 5 financial years.

The remuneration granted to the company's employees during each year from 2020 to 2025 reflects the conditions negotiated according to the Collective Labor Agreement, signed at company level for the years

2020–2021, 2021–2022, 2022–2023, 2023–2024 and 2024–2025 respectively, as well as the application of the applicable legal regulations regarding the establishment of the minimum gross salary per country guaranteed in payment.

Table 7: Evolution of the average annual gross salary of Romcarbon SA employees based on full-time equivalent during 5 financial years prior to 2025

Average annual gross salary based on the full-time equivalent of the Company's employees	Evolution 2024- 2023	Evolution 2023- 2022	Evolution 2022- 2021	Evolution 2021- 2020	Evolution 2020- 2019	Evolution 2019- 2018
Increase in the relative value of the average annual gross salary (%)	8.41%	4.61%	16.54%	10.44%	7.63%	8.56%
Annual average gross salary increase value per company (RON)	450	236	726	415	282	291

The evolution of the main financial indicators of Romcarbon SA for the period 2020–2025 can be found in the table below:

Table 8: Evolution of the main financial indicators during the 5 financial years prior to 2025

The main financial indicators	Financial year 2024 compared to financial year 2023	Financial year 2023 compared to financial year 2022	Financial year 2022 compared to financial year 2021	Financial year 2021 compared to financial year 2020	Financial year 2020 compared to financial year 2019	Financial year 2019 compared to financial year 2018
Operating EBITDA	5,044,478	(4,293,682)	(10,152,024)	1,038,251	1,612,296	55,977
	870.35%	-88.11%	-67.57%	7.42%	13.03%	0.45%
